

Feldberg Adventures with class 6e

This is a story about our class and me going on our first class trip together. It was a Monday morning in July. The train station was full with students, there were also parents, grandparents or siblings who brought the kids. My grandma drove me there by car, when I got there I went straight to my friends. We were all very excited and a little scared about the trip. The train came late but that's typical for a German train. After a lot of waiting the train came, finally we got in but the whole train journey was so stressful. What I mean?

Well first the train was so full that we couldn't get a place to sit, then a few other trains also came late and one student forgot his bag in a train.

Luckily Mr. Lüdtke saw it and took it with him. The last bit we went by bus, we were still very excited although it was so stressful. Well the good thing was nobody had to throw up. The rest of the day we unpacked our stuff and looked around in the hotel/ house, the name of the house was "Jägermatt". Then we ate dinner it was so delicious, after the good food everybody was so tired so we went to bed.

The next few days we did cool activities, we went to a very long walk, we went to the highest mountain it was so beautiful and we had a nice view. We also walked to a lake, I wanted to jump in but we were not allowed to go swim there because there were some plants protected. After a while of walking with my friends and I got so bored but then we started to play truth or dare and then we had fun again. On the next day we went to the forest with Rasmus, he is a nature guide. We learned a lot about the nature and animals like the grouse (Auerhahn). Well... I can't tell a lot because if I'm honest I didn't listen at all. And he told so much, it's hard to remember everything. My favourite activity was on Wednesday, we went to a building called "Haus der Natur". We went in there and a woman was already waiting for us, I was very curious what we're going to do. After she explained what we do and what we need for that, we packed our stuff and walked to a big meadow. There were some wooden benches and a little house. Then we ate something and talked about different things like how excited we are and that kind of stuff. When everyone was ready and finished their food we were allowed to catch insects, it sounds a bit weird and more terrible than it actually is. We didn't hurt or kill them we had an insect catcher, I know it sounds very weird but I don't know how to explain it. However, with this thing you didn't hurt an insect when you catch it. Why have we caught insects? I'll tell you later. We had a lot of fun, I caught very many ants and spiders. My best friend Marit even caught a bee.

After about an hour we went back to the house. We went in a laboratory, where they had many microscopes. After the woman explained to us how they work, we took our insects and put them under the microscope. It was so crazy, you saw so many things you can't see without it. It was so disgusting and scary at the same time! The insects moved a lot so it wasn't that easy to look at a specific place. After we looked at our animals we started to look at ourself. We put our finger under the microscope and hey don't ever bite your fingernails you won't believe how dirty they are. So gross. Then we talked about our animals and in the end we let them free again. Oh and by the way, Marit and I looked at a worm (his name was Egon) and because he was so nervous he shit on the microscope!

The whole class trip was so fun but it ended too fast. At the last day we stood up very early and packed our stuff. Some students packed already in the evening before. We were all so disappointed and upset that we had to leave.

It was so much fun and nobody wanted to leave. Well I was a little happy because I missed my family. After breakfast we met us outside. The home journey wasn't so spectacular we were all tired and bored. Some students slept or at least tried to sleep. When we got to the train station we went straight to our families. My Mum picked me up and everybody went back home. It was the best class trip ever.
